CAREER OBJECTIVE

To work in pragmatic way in an organization where I can show my talent and enhance my skills to meet company goals and objective with full integrity and zest

EXPERIENCE SUMMARY

- Around 6.5 years of software development experience and involved in analysis, design, development, testing and deployment of enterprise applications of different domain with good exposure to object-oriented design, software architectures, design patterns, data structure, Multithreading and agile practices.
- Having 1.3 years of **onsite experience in Mexico** for Anthem Inc.
- Hands on experience in **SPRING MVC, SPRING BOOT** and **SPRING BATCH, Hibernate** framework.
- Hands on experience in **JAVA8** Language.
- Hands on experience in designing and working on **Micro Service & Monolithic** architecture.
- Hands on experience with **SQL** and **NO-SQL** databases.
- Hands on experience in **BIG DATA** tools such as **SPARK** Stream Processing, **HBase** Database and **KAFKA** Messaging Services.
- Hands on experience in writing script to build and deploy the application On **Jenkins**.
- Hands on Experience in **Swagger** documentation
- Good working knowledge in **CICD** and **DEVOPS** process.
- Working with an **Agile**, Scrum methodology
- Hands on experience in **TDD** and **BDD** approach with **cucumber** framework.

Education and Certifications

- **B.Tech – Information Technology** from SRM Easwari Engineering College (2008 – 2012).
- Got **ACE** award in Accenture for individual contribution.
- **Oracle Certified Professional,Java SE 6 Programmer(OCJP)**

SKILL SET

Operating System	: Windows 7, Windows 10, Linux
Languages	: Java, SQL, JavaScript
Frameworks	: SpringBoot, SpringMvc, Hibernate, JPA, Spring Batch, SPARK
J2EE Technologies	: Core java, Java8, JDBC, Servlets, JSP, JSTL, JPA, JMS, Web, SOAP Services, JAXB
DataBase	: Oracle, MySql, Mongo DB, Hbase
Web . Technologies	: Angular JS, HTML, JavaScript, CSS
Application /WebServer	: Apache Tomcat, Weblogic, IBM WebSphere, IBM Liberty Server
IDE	: SPRING-STS, Eclipse, RAD

Versioning Tool : GIT, SVN, Clearcase
BuildTool : Maven, Gradle, ANT
Open source tools & technology: Putty,JIRA, Quality Center, confluence, Log4J,SONAR, JUnit,Fiddler,StartUML,JENKINS,JSON,JProfiler

PROFESSIONAL SUMMARY

- Currently Working in **Accenture Solution Pvt. Ltd, Chennai** as Team Lead from July 2015 to till date
- Worked as Systems Engineer in **TATA Consultancy Services, Chennai** from Aug 2012 to Jul 2015

Project #1 : Docgen Adapter

Client : Anthem Inc., Largest Healthcare service provider, USA
Duration : Jul 2018 to till date
Role : Team Lead/Developer
Team Size : 6
Environment : Spring Boot, Spark streaming, HBase DB, Kafka, CDH, MicroServices
Architecture, BDD, cucumber

Description:

The system will be used to automate the generation of federally mandated documents for product.(SBC – Summary of Benefit Changes; SOB – Summary of Benefit ; EOC – Evidence of Coverage; and BCC – Benefit Comparison Chart. It is capable of colliding the various product document information from 3 other source systems in Hadoop system.

Responsibilities:

- Written Micro Services for Spark streaming of the product information
- Written Utility classes for CRUD operations in Hbase database
- Written KAFKA producer and consumer to handle events
- Coordinated with onshore team to understand the requirements and provide story points
- Lead the offshore team on completion of all the activities by driving them with daily priorities and tasks.
- Created swagger documents for the user stories.
- Written Junit with BDD approach using Cucumber

Project #2 : Enterprise Wellpoint Product Database

Client : Anthem Inc., Largest Healthcare service provider, USA
Duration : Sep 2017 to Jun 2018
Role : Team Lead/Developer
Team Size : 8
Environment : Spring Boot, JPA, Hibernate, Oracle, Kafka stream processing, IBM Liberty Server, MicroServices Architecture, Agile

Description:

eWPD is a web based application which is used by Enterprise Benefit Admins to create and maintain plans & contracts. eWPD houses Individual, Small Group & Large Group plans & contracts belonging to books of business that are managed in WGS and not yet migrated to SPIDER (i.e. CO/NV, CA, GIC, SSB, WCLC, MedSup, etc.) eWPD plans & contract data is transferred to WGS through a nightly batch feed. Data related to these plans and contracts are stored in the DataMart the purposes of generating reports and other forms of analysis

Responsibilities:

- Lead a team of 7 members from onshore in migrating 16 applications from IBM WebSphere Application Server to Liberty Server
- Made decisions on choosing the appropriate technologies which are compatible with Liberty server.
- Guided the entire team on the basic understanding and key highlights of Liberty server and assisted the team wherever required in completion their tasks.
- Lead the offshore team on completion of all the activities by driving them with daily priorities and tasks.
- Coordinated between offshore team and client and provided a timely update to client on the progress of the upgrade activity.
- Made a successful Go live of Liberty Upgrade with at max quality.
- Involved in post upgrade activities such as tracking the fallout defects, triaging and assign them to offshore team for resolution.

Project #3 : Enterprise Product Document Generator

Client : Anthem Inc., Largest Healthcare service provider, USA

Duration : Dec 2016 to Aug 2017

Role : Developer

Team Size : 12

Environment : Spring MVC, JPA, Hibernate, Angular JS, jQuery, CSS, JMS, Mongo DB, WebSphere Application Server, MicroServices Architecture, Agile

Description:

Enterprise Product Document generator is a document generating application. It is capable of providing various type of documents and these documents are useful for availing a health plan . It has the basic functionalities like Create, Clone, View, search and downloading PDF and word documents. Every document is communicated in xml format between server and the application. The main purpose of this application is to generate the product documents. Documents can be generated in either word/PDF format. Cloning, PDF Scrapping, Mass updates, Mass Publish, Reports are some of the important functionalities. It is an end to end application for document processing.

Responsibilities:

- Worked towards migrating the application from Spring Core to Spring MVC
- Effectively communicating with onsite and gathering all the requirements

- Participated in PI planning at onshore, analyzed the requirements and provided appropriate story points
- Provided Support for SIT and UAT Testing
- Created swagger documents for the user stories.
- Written Junit with BDD approach using Cucumber
- Written complex search functionality with criteria builder did performance optimization

Project #4 : Logistics Super Suite

Client : NOL

Duration : Jul 2015 to Nov 2016.

Role : Team Member.

Team Size : 15

Environment : Core java, Spring Batch, Spring MVC, Oracle, Hibernate, JMS, Weblogic, Junit, OTM, OWMS

Description:

LSS aims to address the dynamics of logistics and supply chain management across industries that improve APLL technology offerings and standing in the market as well as improving customer service and internal operation efficiency.

Logistic Super Suite (LSS) is a platform that supports end-end logistics and supply chain management integrated with key logistics applications EDI, OTM & OWMS. It has 6 tacks and 22 key modules and remodeling 30 legacy applications

Responsibilities:

- Handled Booking module on the whole and acted as an SME for it.
- Did Booking inbound and outbound batch using spring Batch.
- Did performance optimization for Booking search and submit using criteria.
- Written Controller Delegate, Façade, Service DAO Interfaces and their implementations.
- Did Sonar validation and resolved all Critical, Blocker and Major issues.
- Written Junit with Mockito and achieved 90%> in all the logic i built.

Project #5 : Netasthra Server Manager

Client : John Wiley, Agility

Duration : Jan 2015 to Jun 2016

Role : Developer

Team Size : 7

Environment : Java, JSPs , Struts2, Springs, Hibernate, HTML DOM, Java script, jQuery, jQuery grid, Highcharts, CSS, AJAX, JSON, DOM Parser, Regular expressions

Description:

Netasthra is a web based portal that provides holistic view of information gathered from various enterprise system management tools in a single window. It can be customized and

personalized to suit individual & organizational needs, based on roles & hierarchies in the organization (like strategic, tactical and operational).

Responsibilities:

- Involved in technical discussions and guiding the team with required inputs to provide the best out of the team.
- Involved in knowledge sharing to the fresher regarding the platform and application.
- Involved in code refracting phase to maintain coding standards throughout the project.

Project #6 : Request for Proposal

Client : TCS Internal

Duration : Jan 2013 to Dec 2014

Role : Developer

Team Size : 18

Environment : Java, Spring MVC frame work, Spring JDBC, HTML DOM, Java script, jQuery, jQuery grid, AJAX, JSON, Apache POI, Maven, iText PDF

Description:

A request for proposal (RFP) is a solicitation document that an organization posts to elicit bids from potential vendors in order to procure a product or service through the responding business proposals. RFP writer is a web based document generation tool which will helps the user to minimize the time for generating / creating RFP documents. It consists of various web forms where users fill customer's basic details, tools used by the customer, customer's business locations, system inventory details and service requirements. Finally the user can define these details where ever needed in a document format.

Responsibilities:

- Involved in requirement analysis, design and development of various modules.
- Involved in DB table designing and designing of web pages.
- Coordinated the User Interface for tree representation of the document structure and other options in this tree.
- Fixing the issues rose during UAT, SIT on priority basis and troubleshoots & performance enhancement.

Visa Details

- Holding B1 Visa (USA) Valid till September '2027

DECLARATION

I hereby declare that the details stated above are authentic to the best of my knowledge and belief.
